DETAILED ACTION

This Office Action is in response to the Amendment filed on March 31, 2004.

Allowable Subject Matter

Claims 1-9 and 11-27 are allowed.

The following is an examiner's statement of reasons for allowance: in re claims 1 and 23, the prior art references do not show a logic apparatus comprising a first and second single-electron device comprising a connection between the third electrode of the second single-electron device and the first electrode of the first single-electron device, wherein for each of the first and second single-electron devices, a Coulomb oscillation in a state that charges are accumulated in a charge storage region is shifted by a half period from the Coulomb oscillation in a state that no charge is accumulated therein. Pertaining to this subject matter, the secondary reference of Wasshuber discloses Coulomb oscillation for storing charges. The applicant's argument that Wasshuber does not disclose the Coulomb oscillation being shifted by a half period is persuasive. In re claims 12, 15, and 27, as stated in the previous rejection, the prior art references, alone or in combination, do not show a logic circuit comprising a first logic circuit using a first single electron device and having a capacitor, a second logic circuit using a second single electron device and having a capacitor, a first terminal connected to a first terminal of the first logic circuit, a resistor connected to a node of the first terminals of the first and second logic circuits and a voltage source, and a ground terminal connected to second terminals of the first and second logic circuits.

Art Unit: 2815

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
